

# How to clear the cache on Firefox

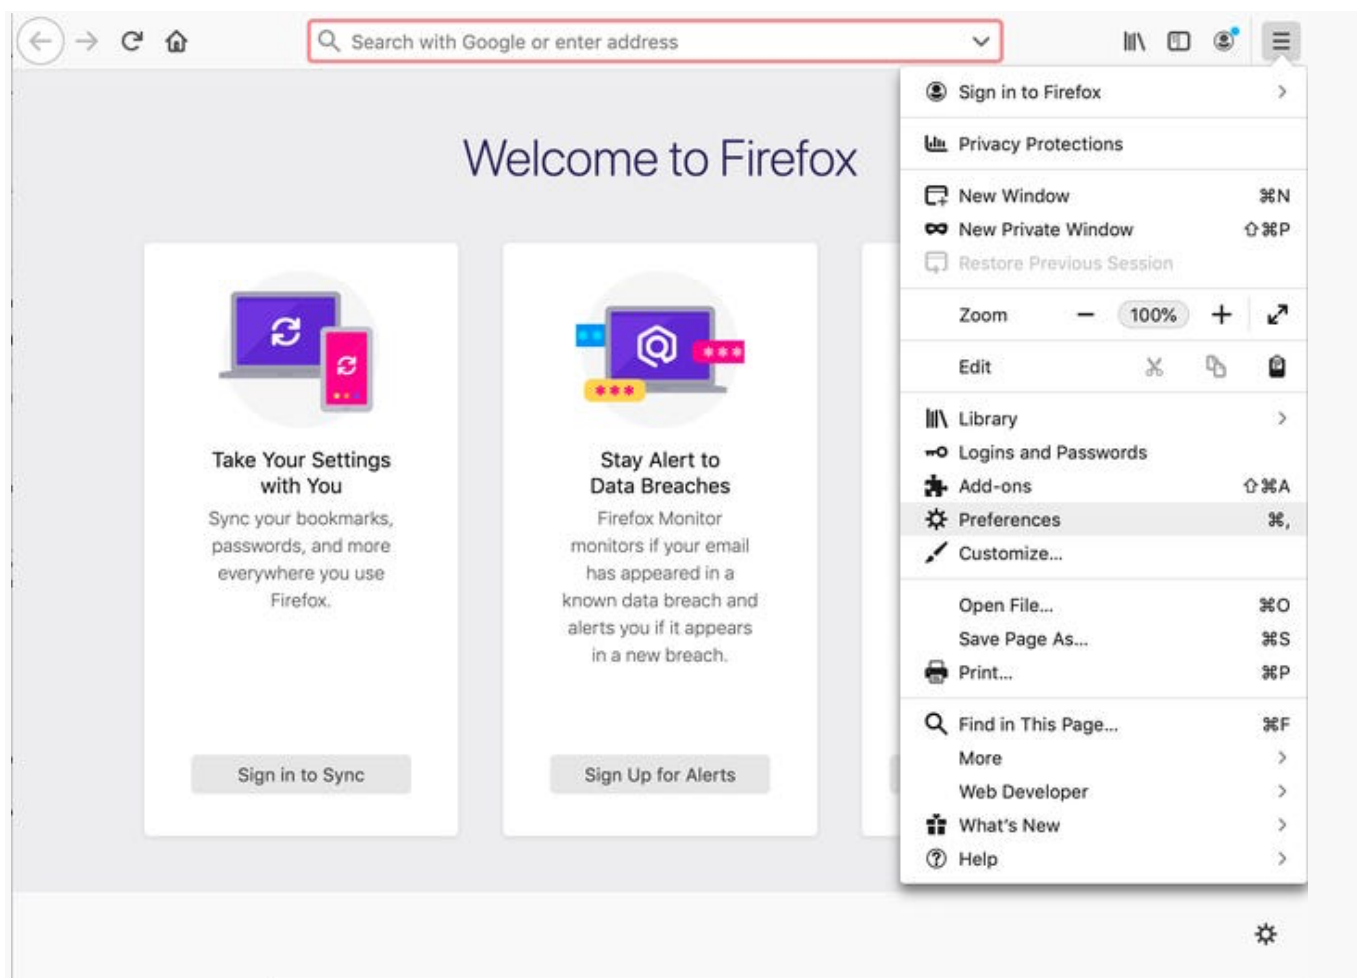

Marissa Perino

Business Insider // Mar 12, 2020

It's easy to clear the cache on Firefox — whether you choose to do so manually or automatically.

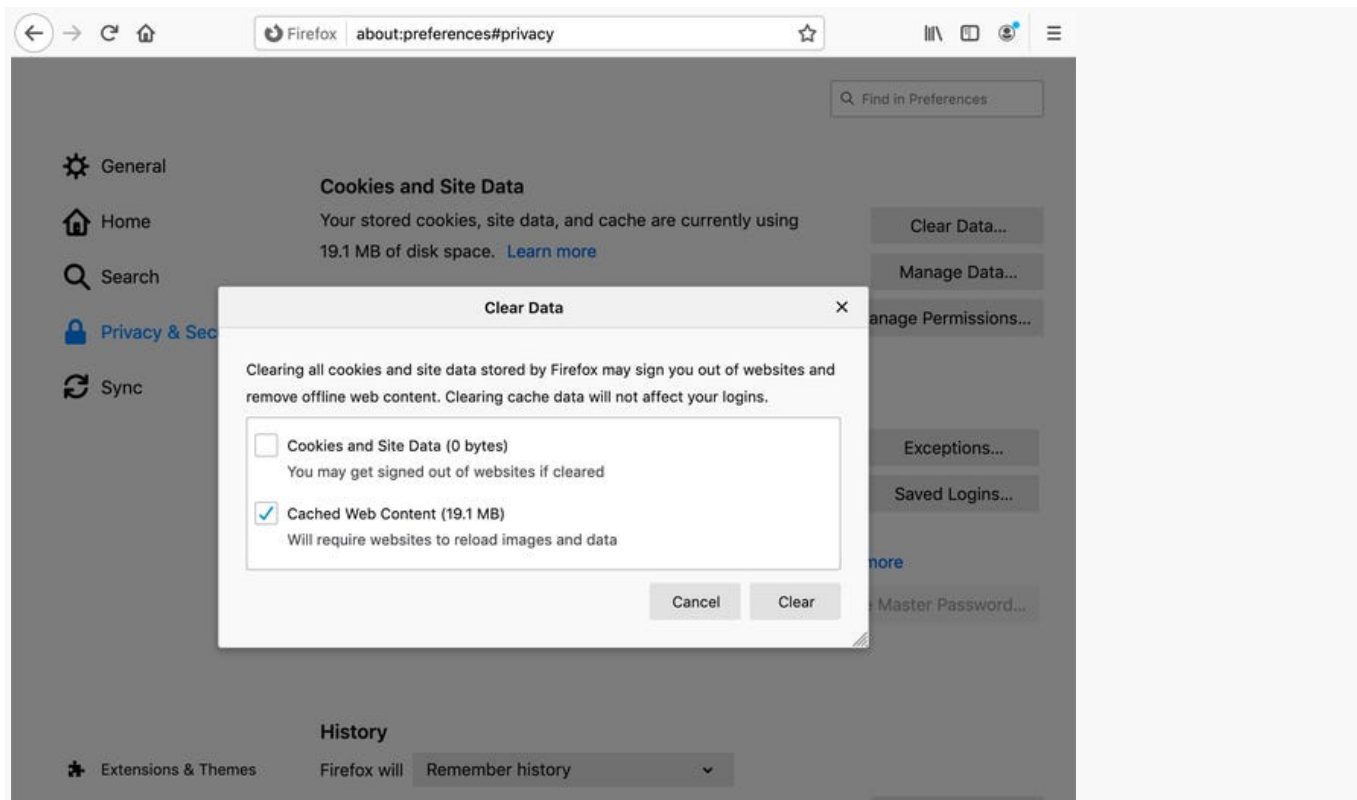

## How to clear cache on Firefox manually

1. Open Firefox on your Mac or PC.
2. Click the menu button in the upper right-hand corner of the browser. This appears as three lines.
3. Click "Preferences" which is located next to a gear symbol. Open "Preferences."

4. Click on the "Privacy & Security" tab on the left-hand side.
5. Scroll down until you see the "Cookies and Site Data" section.
6. Click "Clear Data."
7. Check the box next to "Cached Web Content."
8. Click "Clear" to clear your cache manually.

## How to clear cache on Firefox automatically

1. After repeat step one to four from above, scroll down until you see the "History" section. This is found just below the "Cookies and Site Data" section.
2. Click on the dropdown menu next to "Firefox will." Change the default option of "Remember history" to "Use custom settings for history."

3. A list of options will appear. Check the box next to "Clear history when Firefox closes."

4. Click the "Settings..." button next to this option.
5. Check the box next to "Cache" in the custom settings pop-up.
6. Click "OK" to exit and save your changes.
